

STAMFORD WELL WATER ALTERNATE TESTING (SWWAT) PROGRAM

To expand well water testing, the Community Advisory Panel, in partnership with the Stamford Health Dept and Alliance Water Treatment Company has organized the Stamford Well Water Alternate Testing (SWWAT) program. Homeowners who wish to test their well water for the Pesticides and Volatile Organic Chemicals (VOC) in the same manner as the testing funded by the Ordinance can do so for \$164.50 + tax. This cost to the homeowner is only slightly higher than the \$100 charged by the Ordinance, but much less than the cost of \$350 if a homeowner orders the test on their own. This test result will go to the Stamford Health Dept in addition to the homeowner. This program will start in June 2012 and will end at the end of 2013. Any interested homeowner is encouraged to contact Alliance Water Treatment Company at 203-323-9968 and request the SWWAT Program.
